How to clean

PhotoGlass® and self adhesive vinyl

A **damp cloth** or **soapy water** will clean general dust or dirt off the graphics without leaving a film or residue.

For cleaning off scuff marks we recommend "Orange Solve" from Citrous Resources, Ph 02 8868 6888.

Always try any cleaning product first in a small corner of the graphics to make absolutely sure that no damage occurs prior to more general use. After using any cleaning product wipe the graphics again with a damp cloth.

Never ever use Jiff or Ajax or any slightly abrasive product as they may damage and scratch the surface of the graphics.
