

LightWalls®

illuminate an entire wall

The impressive effect of a **LightWall®** has proven to push the boundaries of boldness and brightness by illuminating an entire wall, side to side and floor to ceiling. **LightWalls®** provide a way for any graphic to be lit from behind, with virtually no restriction on size or location.

LightWalls® are versatile and are being used in retail fit-outs, real estate sales suites and corporate interiors. Our high quality materials produce realistic images with a long lasting finish perfect for almost any environment.

Reed Property Group's Platinum apartment's display centre captures the magic of Platinum's absolute waterfront location at Maroochydore on the Sunshine Coast, Queensland. The curved **LightWall®**, which measures nearly 25 metres wide x 2.6 metres tall, depicts a 180 degree view taken from what will be an eighth floor Platinum apartment.

The Circle on Cavill, Gold Coast display suite designed by Petery Sexty, features an illuminating 9 metre wall with bold, psychedelic graphics that create an environment to enhance visitor's experience. From the outside, the wall provides a visual effect that captures the attention of passerby's.

Wyeth's recent display proves that tradeshow stands don't have to be all grey carpet cubicles and nikko panned name tags. A high impact stand was created using a **LightWall®** and a sleek, simple display. A regular face at industry trade shows, Wyeth wanted to invest a little less but still have an eye catching display. The solution was to rent a double-sided 5.7 x 2.8 metre **LightWall®**.

Push the boundaries of boldness and brightness by illuminating an entire wall
