

Transflex

Display Transparencies

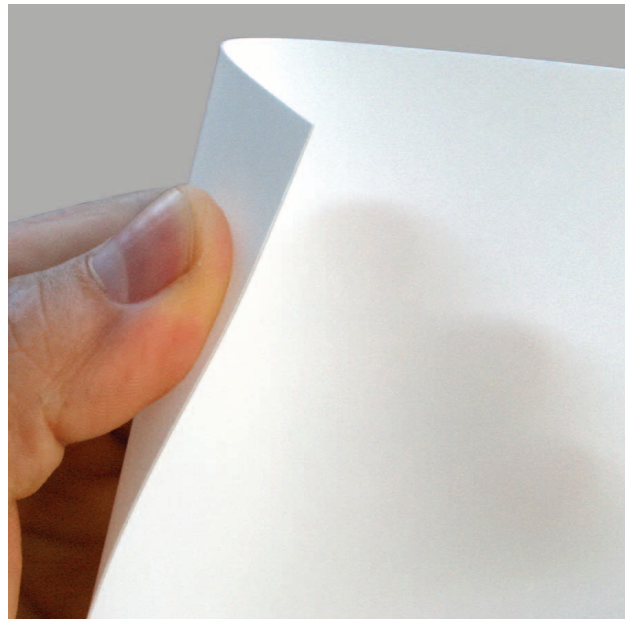

Semi-Rigid display film ideal for backlit menu boards

Transflex Matt is a white, semi-rigid, ultra-smooth, PVC/ Polyester composite material.

Ideally suited for illuminated, digitally printed lightbox displays requiring true colour and photographic quality.

The matt surface produces true, vibrant, eye-catching colours and photo quality images. Designed for premium internal applications but can be used outdoors for short to medium term applications that are not exposed to extreme weather conditions.

Transflex is a more rigid product than Kodak Duratrans and a cost effective alternative. It can also hold a higher D-Max (blacker blacks) and more vibrant pantone colours.

Suitable Applications (internal backlit billboards and wide format posters):

- Menu boards.
- Large format posters.
- Shopping centre advertising.
- In store POS.
- Trade show graphics.
- Show rooms ie; motor dealerships, banking and service providers.
- Entertainment venues ie; casinos, theatres and clubs.
- Television and Studio backgrounds.
- Indoor sporting facilities.
- Static display stands and posters.
- Airport & bus shelter advertising

Features / Characteristics:

- Excellent ink adhesion.
- Waterproof.
- High Light Transmittance
- High image quality > close viewing distance.
- Good dimensional stability.
- Ease of handling and transporting.
- Wide internal backlit applications without joins.
