

TufflineTV Touch

Adding interactivity to your display has never been easier

You no longer need expensive, complicated systems to add touch screen capabilities to your display. The TufflineTV Touch is designed for the Apple iPad with features including Wifi, 3G or 4G. TufflineTV Touch can be made to fit other tablets by quotation.

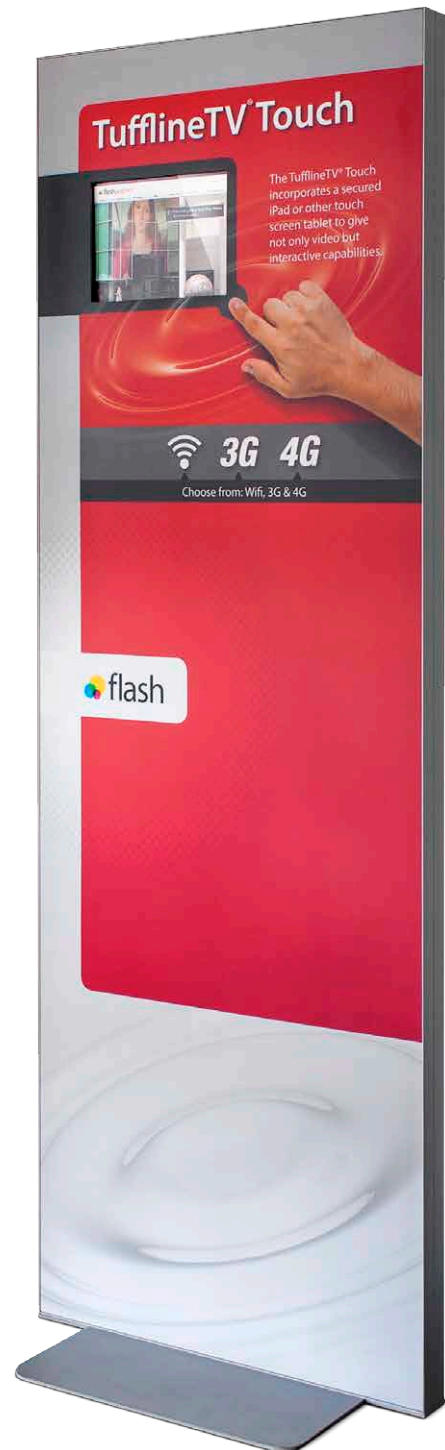

A lockable security case bolted to the Tuffline's structure helps prevent your tablet being removed by an unauthorized person.

The tablet is powered by a USB cable protruding from the back of the unit.

As with all tuffline frames, the high quality graphics can be easily removed and updated in seconds.

Dimensions:

550mm wide x 1630mm high

from
\$1050
Also available with amplifier & speakers for \$1400.
